

Introduction to GlyMed Plus

Welcome to the GlyMed Plus Canada Family!

GlyMed Plus is more than just a skin care line; it is a system that encompasses client home care and clinical treatments which are supported by the most progressive, informative and available education in the industry. GlyMed Plus is a professional only skin care system available only through Certified Estheticians and Skin Care Professionals.

GlyMed Plus is the Brand of the Skin Care Professional™.

Mission Statement

At GlyMed Plus, our mission is to provide you with professional skincare resources that deliver unparalleled results. The foundation of our products, services and education comes from using the highest-quality pharmaceutical-grade ingredients to promote healthy, beautiful skin.

Skin Care For All

GlyMed's comprehensive skin care line encompasses a full spectrum of products for client home care and clinical back bar treatments. These products help address a multitude of concerns in individuals with various backgrounds and skin conditions, including acne, aging, hyperpigmentation, rosacea and pre/post-procedure care. Combine products to provide a truly customized treatment experience and home regimen that meets your client's needs.

A Leader in the Botanical Skin Care Revolution

For centuries, the use of plants has been used as a remedy for various conditions, both internally and externally. We know for healthy bodies, we must fight free radicals through the use of antioxidants and with scientific support, we can have the same healthy benefit for our skin.

Our botanicals come from all parts of the world including Asia, Africa, Europe, South America, and of course the US and Canada. They are grown and cultivated to retain their purity and efficacy. We demand that our botanicals come from suppliers that meet these criteria. We do our own processing; using techniques that retain the beneficial properties in the highest concentration possible, thus assuring our customers that GlyMed Plus is committed to an exacting standard of excellence.

Pharmaceutical vs. Cosmetic Grade Products

According to the FDA, pharmaceutical grade products are required to be 90% pure, where Cosmetic Grade products are only required to be 70% pure.

Pharmaceutical grade products that you apply topically penetrate through the layers of the epidermis and affect the function and structure of the skin. Pharmaceutical grade products are only available through a licensed professional. These products not only contain a higher percentage of active ingredients, but a higher quality of each ingredient. Active ingredients and percentages make a difference in the skin leading to more effective and faster results.

A few Benefits of GlyMed Plus

- ◆ Pharmaceutical Grade for Maximum Results
- ◆ High Quality & Effective Ingredients
- ◆ Organic Botanicals
- ◆ Cruelty-Free & Vegan-Friendly
- ◆ No Unnecessary Chemicals
- ◆ No Synthetic Fragrances

GlyMed Plus Sublines

MAIN

GlyMed's Main Skincare Line consists of tried-and-true formulas that rejuvenate the skin with pure botanicals and pharmaceutical grade ingredients. Vital nutrients support collagen production and cellular renewal for healthy, younger acting and looking skin.

This line can be used for a wide variety of skin conditions as well as healthy maintenance using age-defying, healing and repairing ingredients. From cleansers to serums and moisturizers, this system has formulas for all skin types and concerns and all Fitzpatrick Types.

ACNE

GlyMed's Acne Skincare Line is second to none with state-of-the-art ingredients proven to reduce and control acne and reduce the potential of lifetime scarring. Formulations within the Acne Line are proven remedies to reduce the serious effects of all grades of acne. This line controls the bacteria and oil that fuels the fire of acne using cleansers of various strengths, spot-treatments and masques.

ELITE

The Elite Skincare Line contains GlyMed's most cutting-edge formulas, guaranteed to combat challenging skin conditions and achieve superior results. Build cellular hydration, increase lamellar body production and reduce fine lines and wrinkles using our finest selection of cleansers, serums, masques and moisturizers. The secret to these unique formulas is a high concentration of pure active ingredients infused with organic botanicals.

PROFESSIONAL ONLY

GlyMed's Professional Only products use powerful active ingredients to penetrate deep into the skin for long-lasting effects. Reserved for licensed professionals only, this line offers supreme solutions for a variety of skin concerns including acne, aging, hyperpigmentation and rosacea, along with healthy skin maintenance.

GlyMed Plus 4 Steps to Healthy Skin

Appropriate skin health is based on a 4-step process of Cleanse, Treat, Balance and Protect.

GlyMed Plus builds our treatment protocols and home care routines on these 4 steps

Step 1 | Cleanse

The first step removes oil, dead skin cells and environmental pollutants-debris which forms free radicals, while preparing the skin to receive active ingredients and vital nutrients in the Treat and Balance steps.

The “GlyMed Plus Double Cleanse” is incorporated into all clinical treatments and recommended for evening home care routines to ensure all makeup is removed from the skin and to prepare the skin to receive the active ingredients. The first cleanse utilizes a lipid-based cleanser to dissolve oil, makeup, dirt and debris, while the second cleanse utilizes a water based cleanse with active ingredients to further cleanse the skin and slightly lowers the pH of the skin so the active treatment products can work more effectively.

Step 2 | Treat

The active step! This step delivers vital and effective ingredients to treat a specific skin condition(s) and helps to restore, replenish and revitalize the skin. Advanced product formulations with active ingredients including for example, Alpha Hydroxy Acids, Retinols, Peptides, Tyrosinase Inhibitors, Salicylic Acid, Benzoyl Peroxide and more, focus on treating specific skin conditions and concerns. This step will physically affect change in the epidermis and dermis.

Step 3 | Balance

The nourishing step! The balance step uses targeted ingredients to revive your skin’s ability to repair and renew for a nourished, healthy glow. Organic antioxidants, ceramides, hyaluronic acid and anti-inflammatories nourish, balance and protect our skin cells. This crucial step in any clinical treatment and home care routine, reinforces the lipid bi-layer in the epidermis to create an optimal healthy cellular environment to promote healing.

Step 4 | Protect

The final step! Daily application of photo-age protection protects the skin against the sun’s damaging UVA/UVB rays and environmental pollutants and debris. SPF ensures your skin’s ability to grow and build healthy skin cells.
